Preface

What is the Faculty of Social Science Year-in-Review?

This Year-in-Review document for the Faculty of Social Sciences (FSS) is somewhat of a hybrid between the University Factbook and a faculty member’s Annual Record of Activities. Its primary purpose is to document (and thereby highlight) key attributes of the FSS at this time and the many activities and accomplishments over the past year of its faculty, staff and students.

The primary audience is internal to the university, indeed, internal to the Faculty itself—faculty, staff and students within the FSS. This is not intended to be a “promotional” document targeted to external audiences, though the systematic collection and compilation of the kinds of information in this document can provide a basis for more effective communication to external audiences of the important work and accomplishments of the faculty, staff and students of the FSS.

As this is the first attempt to do this, this first edition is incomplete: we would have liked to have painted an even more comprehensive picture of the FSS, but data limitations precluded this. Over time our data systems and internal data-gathering processes will improve so that we can paint a fuller picture in the future, and we look to faculty, staff and students in the FSS to help in this effort. Data limitations also mean that, although the focus is the 2016-17 academic year, available data do not always align with these dates. Hence, some data refer to the 2016 calendar year, some to the 2016-17 fiscal year, and so forth. In each case, we have used the data available that most closely approximates the 2016-17 academic year.

I want to thank all those who worked hard to produce the data included in this Review, and in particular, Stacey Gabitous, Coordinator of Marketing and Communications for the Faculty.

People
The underlying strength of the Faculty of Social Sciences (FSS) derives from the commitment, passion and hard work of the people who make up the Faculty—its faculty, staff and students. The FSS is fortunate to be able to attract exceptional individuals to carry out the important work of the Faculty.

Faculty Complement
In 2016-17, the Faculty of Social Science had a total FTE faculty complement of 130 people. This complement comprised 102.5 FTE tenure stream faculty, 13.0 FTE teaching stream faculty, and 14.5 FTE faculty with Contractually Limited Appointments (CLAs). This faculty complement is distributed across departments, schools and programs as follows:

Alumni Award:
- McMaster awarded the Distinguished Alumni Award to two-time McMaster Economics graduate Junsen Zhang, November 2016.

Honorary Degrees (Doctor of Laws)
- Michael Hayes, Director of the School of Public Health and Social Policy. He's also Director of Health Education and Research, University of Victoria. Michael Hayes is one of Canada’s most influential scholars and advocates in the field of population health and health geography.

- Bruce Kuwabara, founding partner of the firm KPMB Architects, invested Officer of the Order of Canada, recipient of the RAIC Gold Medal, Board Chair of the Canadian Centre for Architecture. Bruce Kuwabara is an internationally acclaimed, award-winning architect noted for his work and advocacy on issues of architecture, urbanism and sustainable design.

- Joseph. S. Mancinelli, International Vice President, Regional Manager for Central and Eastern Canada for the Laborers’ International Union of North America (LiUNA), and Chair of the Labourer’s Pension Fund of Central and Eastern Canada. Joseph Mancinelli is a community builder. He has served on the Board of Hamilton Health Sciences, Chaired the Bay Area Health Trust; served on the St. Joseph’s Healthcare Campaign Cabinet, started a scholarship program for children of LiUNA members and served as a Hamilton-Wentworth Separate School Board Trustee. At McMaster, he helped establish the Enrico Mancinelli Professorship in Global Labour Issues and the Chair in Heavy Construction. Mr. Mancinelli and LiUNA have been trailblazers in renewing downtown Hamilton.

Notable Milestone
- May 2016 – The Department of Religious Studies celebrated its 50 Year Anniversary.

Research and Scholarly Activities
The faculty in Social Sciences conduct internationally recognized research that tackles many of the most important social, political, and economic challenges today. The Faculty has particular strength in applied, policy- and community-focused research in partnership with diverse organizations, agencies and groups from the non-profit sector, the private sector, and all levels of government. These collaborations are especially strong at the local and regional level, but extend provincially, nationally, and internationally. This focus on engagement also supports the Faculty’s role as a leader at McMaster and nationally within Canada in knowledge mobilization. Below we present some common indicators of the quality and scope of our research activities. The data presented paint an incomplete picture of the nature and impact of the research undertaken within the Faculty, in part because such indicators can only ever capture part of the
story and in part because of incomplete research data systems, but they represent an initial effort to document important facets of our research activities.

Publications
A search of major bibliometric databases for 2016 returned 223 individual publications by current faculty in Social Sciences. This represents a lower-bound for publications by Social Sciences faculty as it does not include many types of research publications not captured in bibliographic databases, including reports and related documents for government and community partners. The identified publications took the following forms:

Research Funding

Current External Funding Faculty in Social Sciences, 2016-17

In 2016-17, 85 Social Sciences faculty held research funding as principal investigators (PIs) valued at over $7.4 million.\(^1\) Tri-Council Grants account for 81.5% of funds, external non-Tri-Council sources account for 18.5%, and the remaining 1% of funds were derived from Arts Research Board funding.

Applications for Research Funding, 2016-17

In 2016-17, 40 Social Sciences faculty members and post-doctoral fellows submitted 99 applications for research funding as the Principal Investigator of the project. 53% of these applications were successful, attracting over $2 million in new research funding to the Faculty. 95% of this funding came from external sources (82% federal Tri-Council agencies) and the balance came from internal McMaster sources.

Research Partners
Faculty and researchers from the Faculty of Social Sciences partner with diverse organizations and agencies locally, regionally, provincially, nationally and internationally. Our research partners cut across all sectors and include other academic institutions, public-sector organizations, community non-profit organizations, and private-sector firms. The Faculty has never before attempted to compile a list of our formal research partners (i.e., named partners in research grants and contracts), and two things quickly became evident as we tried to do so: (a) the number of partners far exceeds what we can list in a document such as this; and (b) our data do not allow us achieve a complete census. The data below, though considerably incomplete, provide an indication of diversity and types of research partners with whom we work.

Post-Secondary Institutions
- FSS faculty partner with most research-intensive Canadian universities
- FSS faculty partner with universities located in Europe, Asia, Australia, Africa, North America, and Latin America

Created by the Faculty of Social Sciences, the McMaster Research Shop (http://researchshop.mcmaster.ca) is a novel blend of community engagement and platform for experiential learning. In the Research Shop, graduate and senior undergraduate students undertake “rapid research” to answer questions posed by community organizations that address key needs of the organizations. The students learn valuable research skills and knowledge of how to work with community organizations; the organizations get answers to questions they don’t have the capacity to address themselves.

Between May 2016 to March 2017 the Research Shop contracted over 40 students across 6 faculties to work on 11 projects with 13 community partners.

**Community partners:**
- Beasley Neighbourhood Association
- Global Hamilton Connect
- Good Shepherd
- Hamilton Arts and Letters
- Hamilton-Burlington Trails Association
- Hamilton Chamber of Commerce
- Hamilton Community Foundation
- Industry Education Council
- Social Planning and Research Council of Hamilton
- Workforce Planning Hamilton
- Grandview Kids Rehabilitation
- Centre [3] for Print and Media Arts; INKspire.

**Examples of rapid research projects completed:**
- Literature review and environmental scan for the Chamber of Commerce
  What are best practices for inter-city economic development and collaboration (North American and global examples)? How might Hamilton and Burlington municipalities and other institutions/businesses best collaborate?
- Designed, implemented, and analyzed results from a survey for Hamilton Arts and Letters
  How does Hamilton Arts and Letters magazine contribute to the literary and artistic life of Hamilton? What are best practices for evaluating arts organizations/magazines?
- Created an archive and report of research projects conducted in (and on) the Beasley neighbourhood for the Beasley Neighbourhood Association
  What are the real and perceived impacts of community/campus research projects that have taken place 2007-present in the Beasley Neighbourhood?
• Conducted a systematic review for the Good Shepard
   How can Good Shepherd attract and sustain young people (18-35) as donors to social services?
• Conducted an environmental scan for the Furniture Bank in Toronto
   What is the feasibility of a Furniture Bank social enterprise in Guelph-Wellington?

Scholar in Community

The Scholar-in-Community Fellowship was initiated in 2015 to support and recognize social science research collaborations with Hamilton community organizations. The 2015 fellow, Mirna Carranza (Social Work), partnered with the Immigrant Working Centre (IWC) and two child welfare organizations (Hamilton Children’s Aid Society and Catholic Children’s Aid Society) to clarify the intersection between immigrants’ acculturation and Child Welfare involvement. Carranza has developed a network across Ontario expanding into Manitoba, Alberta and Newfoundland.

The 2016 fellow, Tina Moffat (Anthropology), partnered with Neighbour-to-Neighbour (N2N) Hamilton to help N2N establish a research and evaluation framework for their new Hamilton Community Food Centre (HCFC), and to critically investigate current questions and issues related to the Hamilton Community Food Centre program evaluation tools.

Moffat has expanded her network of people affiliated with food insecurity related work in the City of Hamilton. This supports her ongoing work on maternal nutrition; Hamilton Community Food Centre is now hosting a Welcome Baby program at its site (Public Health nurse and dietician). Importantly, the fellowship has enabled fellows to enhance their community-based research skills, which is essential for building future partnerships. Moffat explains, “I’ve learned how to do community-based research, as opposed to just doing research in a community organization. This is a true partnership, where there is negotiation between the needs of academic and community partners.”

Telling the Research Story - Knowledge Exchange and Knowledge Mobilization

Seminars and Speakers Series

The departments, schools and programs within the faculty sponsor regular seminar or speaker series that this year hosted nearly 100 talks focused on cutting-edge research in progress and the latest policy developments. These exchanges help ensure our faculty and graduate student research stays at the frontier of the social sciences and reflects the latest developments in science, policy, and the community.
Research Snaps

Telling the story of what we do and why it matters, one research project at a time.

The award-winning Research Snaps program creates highly readable summaries of research projects, housed on an easily searchable website. Each summary includes links to original articles (if open access) and faculty profiles. Created in 2015 by the Faculty of Social Sciences to enhance our knowledge mobilization, the initiative now has a university-wide impact, with 88 Snaps (62 from FSS).

http://snaps.mcmaster.ca

In the 2016-17, academic year 21 Snaps were produced for the Faculty of Social Sciences.

Mentions

The McMaster Faculty of Social Sciences is known for making a positive impact on the local, national and international stages. In 2016, the Faculty of Social Sciences received 124 external news mentions (Local and national TV, newspapers and radio).

Some of the most view stories of 2016 include:

Black Death
The Globe and Mail reported on research led by Hendrik Poinar (Ancient DNA Centre), which found that the bacterium responsible for the Black Death remained essentially dormant in Europe, only to re-emerge in waves that killed millions of people over several centuries.

The real cost of precarious work
The Toronto Star published a story highlighting new research into precarious work by Wayne Lewchuk (Labour Studies/Economics). The National Post interviewed Lewchuk for a piece on new research showing that as many as one in five people in the Greater Toronto and Hamilton Area is suffering from some form of mental illness.

Missing, murdered, and remembered
The National Post, The Hamilton Spectator, 570 News, the Saskatoon Star-Phoenix and CHCH News featured interviews with Vanessa Watts (Indigenous Studies) about the federal government announcing the terms of its inquiry into missing and murdered Indigenous women and girls. The National Post quoted Watts again in a follow-up piece.

The popularity of Trudeau
The Toronto Star interviewed Henry Jacek (Political Science) about the continuing popularity of Prime Minister Justin Trudeau.

### Undergraduate Teaching and Enrolment

Undergraduate enrolment in Social Sciences programs stabilized in 2016-17 at just under 3800 FTE students. During the 2016-17 recruitment cycle, the Faculty received 6270 applications for admission to level 1, made an offer of admission to **4385** of those applicants (70%), and received confirmation of acceptance from **1119** of them (25.5%). This number of confirmations is 1.36% above 2015-16.

Experiential Education
The Faculty of Social Sciences was the first faculty at McMaster to offer a formal undergraduate Experiential Education (EE) program, and it continues to offer varied and enriching experiential-education opportunities for our students that promote strong connections between academic studies, career exploration, and community involvement. EE has over a dozen individual programs that fall into four broad areas of activity: (a) supporting students’ professional development; (b) experiential placements in workplace settings; (c) awards and grants to support students’ experiential learning; (d) and partnering with community organization in a variety of ways that support the mission of EE.

Note: All EE information is reported on the 2015-16 academic year

Professional Development
A total of 378 students enrolled in four Experiential Education courses designed to support students’ professional development:

- SOC SCI 1EL0: Introduction to University Through Experiential Learning
- SOC SCI 2ELO: Career Planning Through Experiential Learning
- SOC SCI 3EL3: Leadership Through Experiential Learning
- SOC SCI 3F03: Social Sciences in Action

An additional 234 students participated in Experiential Education workshops that promote professional development, career planning and career networking, including the following:

- Learning Portfolio Workshop
- Personal Branding Workshop
- Information Sessions
- Career Networking Breakfast
- Employer Information Session
- Career Conversations and Panels
Experiential Placements

Experiential placements put students in the workplace so that they can learn first-hand what is involved in various professions and can gain valuable professional experience. Placements include both unpaid career placements such as job shadowing (37 placements) and paid internships (17 internships).

Awards & Grants

In 2015-16, 29 Social Sciences students received funding through the Office of Experiential Education. The majority of funds supported Undergraduate Research Awards (USRA): 12 students from seven departments received USRA awards. In addition, 12 students received student experience grants and five students received funding through the Hamilton Matters Fund. Finally, three faculty received funding to support the integration of experiential learning into their courses.

EE Community Partnerships

Partnerships with community organizations provides hands on skills development and integration of classroom theory in real world scenarios. In the 2015-16 academic year, EE worked with 89 community partners in 78 unique organizations.

In addition to these graduate programs based in the Faculty of Social Sciences, Departments within Social Science participate as partners in two inter-faculty graduate programs:

- Global Health Masters Program
- Health Policy PhD Program
Graduate Enrolment

Social Sciences programs enrolled **342.2 FTE** graduate students and 4 diploma students, distributed across departments and programs as follows:

Financial Matters

Faculty of Social Science Budget

From a fiscal perspective, the Faculty of Social Sciences had a successful year in which it ran a surplus, enabling the Faculty to reduce its debt, aided by time-limited, incentive match funding from the Provost. The table below presents high-level statement of our finances for 2016-17. A few aspects are noteworthy:

- over 90% of FSS revenue is derived from tuition and government funding for students enrolled in our programs and students we teach in our courses
- contributions to support central university support services (which range all the way from heat to human resources to the library and to the President’s Office) constitute just over 42% of our revenue
- Over 90% of FSS expenditures are for people: faculty, staff, and TA support
- Over the last few years the Faculty has been able to reduce its accumulated debt from over $5 million to just over $2 million, which is integral to our fiscal sustainability going forward.

Donations and Gifts to the Faculty of Social Science

The Faculty of Social Sciences benefits from, and greatly appreciates, financial donations from many alumni and friends. In 2016, over 370 individuals and organizations donated over $482,000 to Social Sciences, and pledged an additional $472,000 in donations for the coming years. We thank our generous donors. This support enables many students to attend university who otherwise would not be to, and helps sustain many programs vital to the educational and research mission of the Faculty.
Physical Spaces

The most important space development for the Faculty of Social Sciences in 2016-17 was the opening of L.R. Wilson Hall, which is shared between the Faculties of Social Sciences and Humanities. The facilities included in L. R. Wilson Hall will enable the Faculty to expand and enhance our research, teaching and community engagement. Of particular note are the state-of-the-art active-learning classrooms, advanced research labs that will support cutting-edge empirical social science research, and meeting spaces that support community engagement. As a LEEDS Gold-certified facility, it also reflects our commitment to innovation and sustainability.

The majority of space occupied by Social Science programs is within Kenneth Taylor Hall, but Social Science faculty, staff and programs also occupy space in Chester New Hall, General Science, McMaster Innovation Park, Michael DeGroote Centre for Learning and Discovery, University Hall and L.R. Wilson Hall.
